

Approvals / Listings for Cadco Convection Ovens:

Our convection ovens are manufactured to Cadco Ltd. specifications by UNOX S.p.A. / S.r.l., Italy.

All have NSF, and UL through either CSA Standards or through MET:

1) SAFETY: All units are approved to the **Commercial UL Standard** for use without a mechanical ventilation system **IF** local codes permit.

The "MET" mark on our current data ovens data labels refers to the MET Product Safety Listing. (The MET Certification Directory web address is:

<http://corp.metlabs.com/safety/listing.asp> ;

type **UNOX** into the Company "Search By" box and click the "Search" button to verify oven models certification.

To view "What's the difference between the UL and MET Listed Marks?",

go to <http://www.metlabs.com/Services/Product-Safety-Testing/MET-vs-UL.aspx>)

(for all Models except OV-003, OV-013 & OV-023 series:)

Certifications are listed under the oven manufacturer, UNOX S.p.A.,

MET Product Safety Listing ID: E112912,

covering all ovens except OV-003/013/023 oven models.

*(*Please note: UNOX previously had all the ovens/proofers except the newer OV-Series ovens (OV-003/013/023) listed via CSA to UL Standards.*

They have since switched to listing via MET to UL & CSA standards, so they no longer appear on the CSA website. The XAL135 & XAL195 proofers have just been switched over to MET .)

(for Models OV-003, OV-013 & OV-023 only:)

Certifications are listed under the oven manufacturer, UNOX S.r.l.,

MET Product Safety Listing ID: E112716, covering OV-003/013/023 series oven models.

2) SANITATION: All units are approved to **NSF Standard**.

*Ventilation guidelines for current Cadco Convection Ovens:

Under local state or health codes, (i.e., California Department of Health & Safety,) our type convection ovens can *often* be used without a mechanical ventilation requirement under the following general conditions:

- 1) Maximum operating temperatures without mechanical ventilation shall be approximately 450 degrees F.
- 2) Only breads, rolls, pastries, other baked goods and pizza may be prepared in the oven without mechanical ventilation.
No meats or poultry may be cooked in the oven without mechanical ventilation.
- 3) The unit is operated in a well-ventilated area approved for food preparation.
- 4) The unit will be installed, serviced and maintained according to manufacturer's specifications.

(NOTE: California now requires an application and application fee to be considered for a waiver from hood requirements for any cooking appliance**)**
